

Step 1: Open the App Store

From the home screen of your Apple TV, open the App Store.

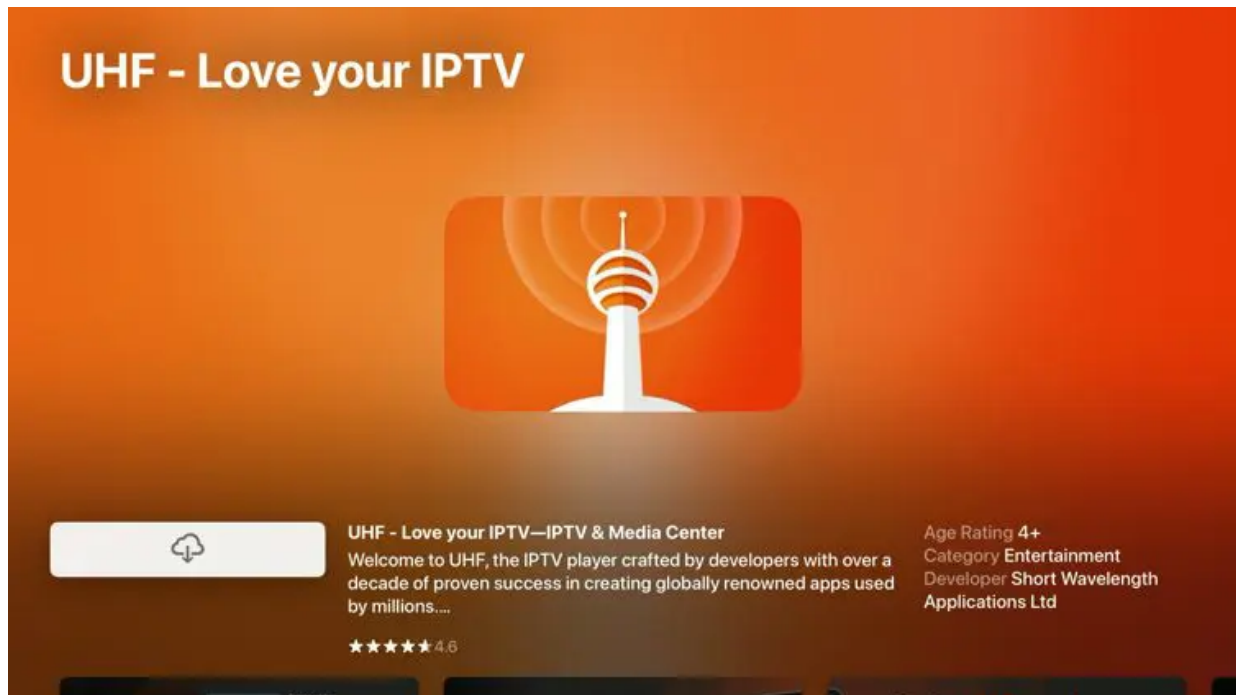

Step 2: Search for UHF

Click the search icon, type UHF, and select the first result.

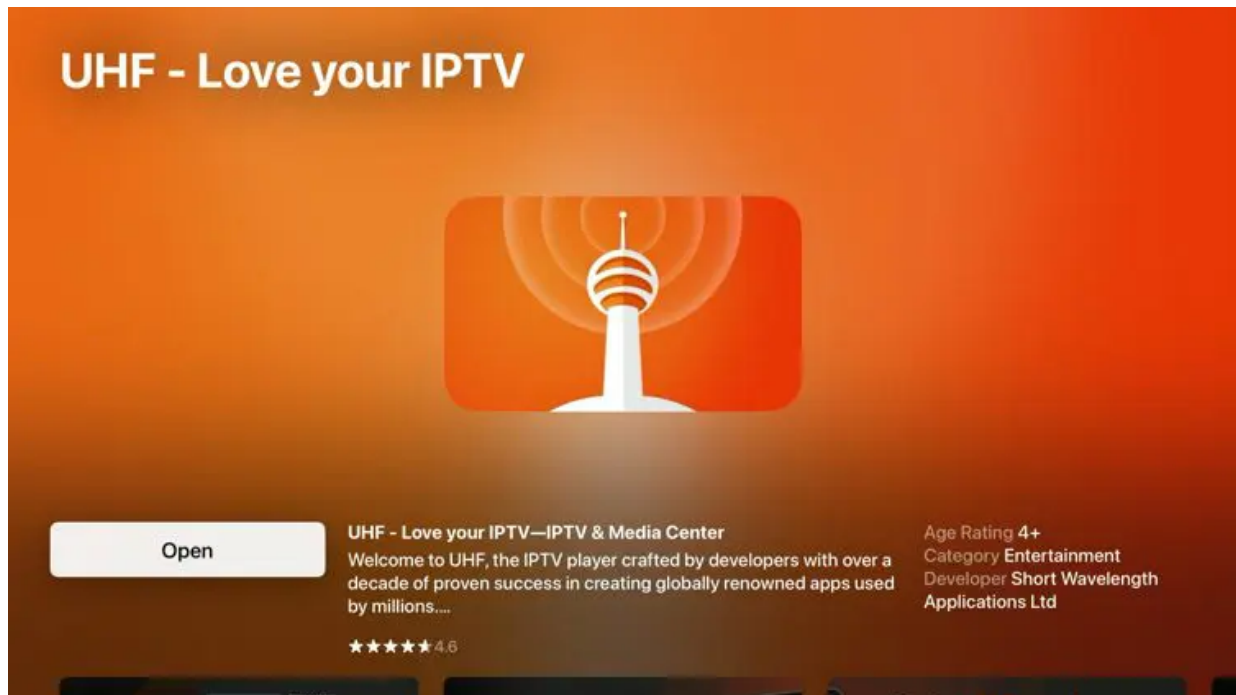

Step 3: Download the App

Click the download icon to install the UHF IPTV app.

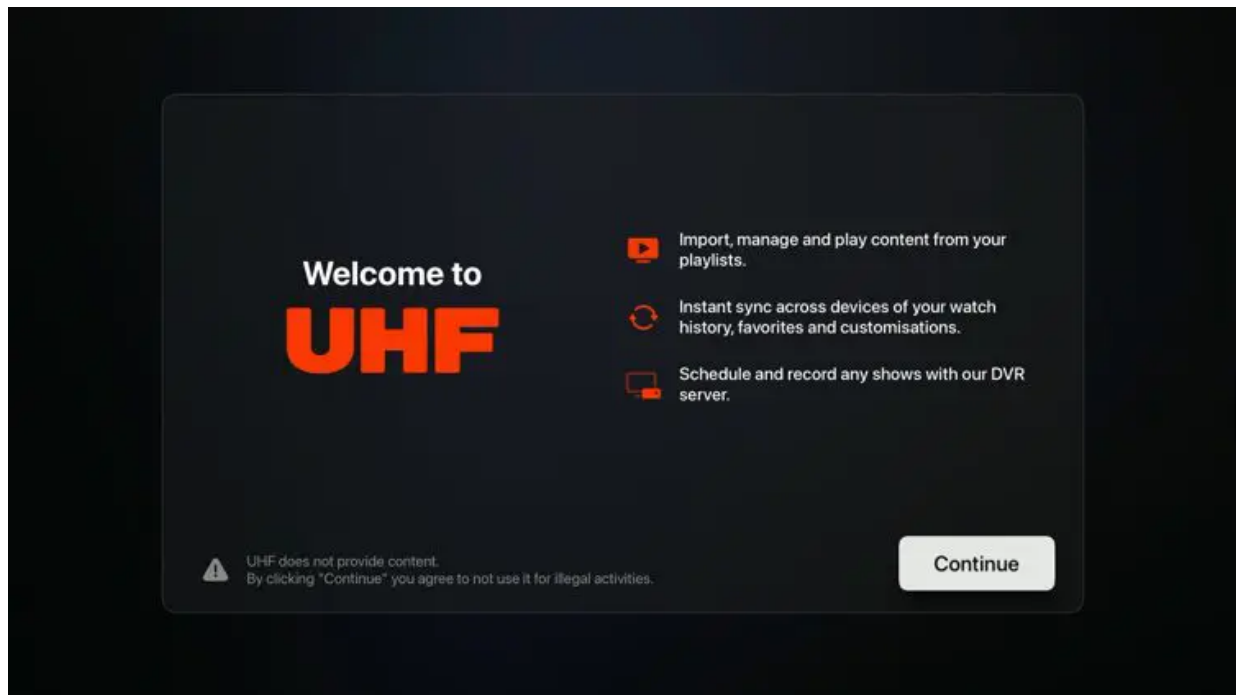

Step 4: Open the App

Once installed, click Open to launch the app.

Step 5: Continue

Wait for the app to load and click Continue.

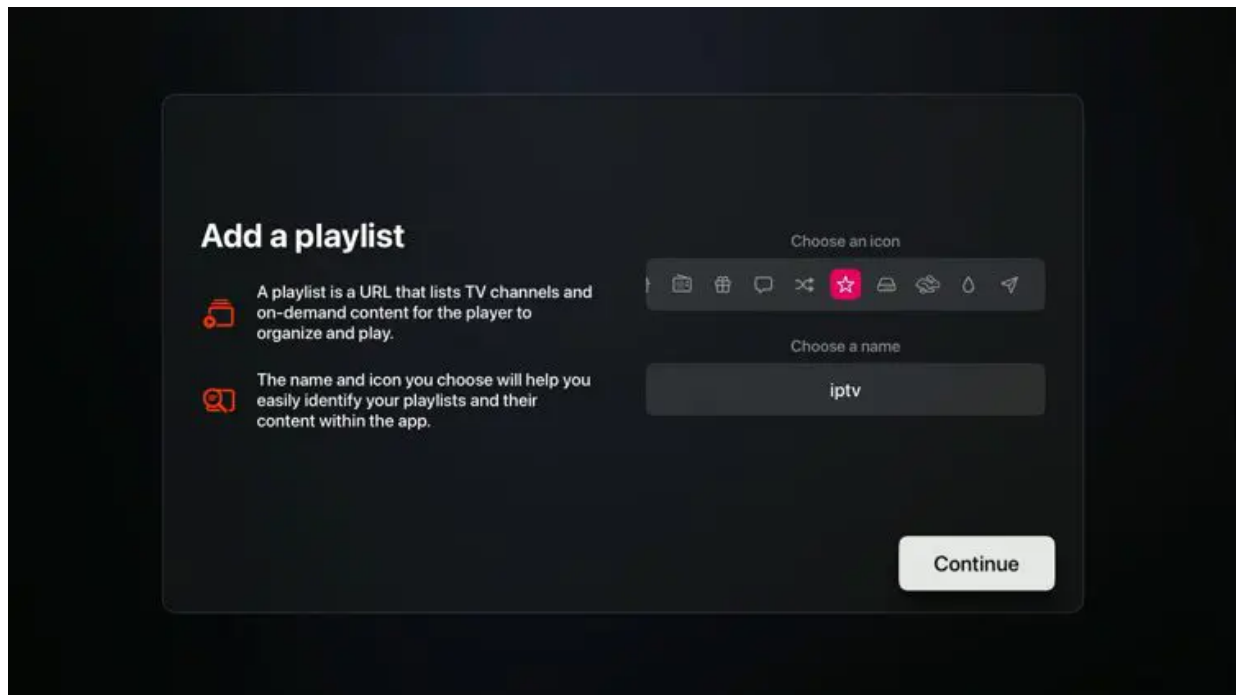

Step 6: Start From Scratch

Select Start from scratch to add a new playlist.

Step 7: Create Playlist

Choose an icon, enter a playlist name, and click Continue.

The screenshot shows a dark-themed interface for creating a new playlist. On the left, under the heading "Add a playlist", there are two explanatory paragraphs. The first paragraph, accompanied by a red icon of a document with a play button, states: "A playlist is a URL that lists TV channels and on-demand content for the player to organize and play." The second paragraph, accompanied by a red icon of a speech bubble with a play button, states: "The name and icon you choose will help you easily identify your playlists and their content within the app." On the right side, there are two selection areas. The first, labeled "Choose an icon", shows a horizontal row of ten icons; the fifth icon, a red star, is highlighted with a red background. The second area, labeled "Choose a name", is a text input field containing the text "iptv". At the bottom right of the form is a white button with the text "Continue".

Add a playlist

A playlist is a URL that lists TV channels and on-demand content for the player to organize and play.

The name and icon you choose will help you easily identify your playlists and their content within the app.

iptv

Continue

Step 8: Choose Login Method

Select M3U or Xstream Codes based on your IPTV service details.

Access details

 M3U8, Xstream, and Manifest are the methods supported by the app to recreate your content library.

 Some content can be restricted by location. We recommend using a VPN to access it.

Step 10: Download Playlist

Wait while the playlist downloads and saves.

Step 11: Load Channels

Wait a few minutes for channels and content to populate.

Step 12: Installation Complete

Your IPTV service is ready to use. Enjoy streaming!
